

Register first or not?

You do NOT need to first register before using this site. The advantages of registering are that it will make it faster for you on subsequent visits to this site as your details will already have been registered. You will also be able to see the details of previous orders placed by you. There is no participation fee charged for you to use this site – you simply pay for the products you order along with any delivery charge which the retailer may apply.

Searching: - you can

- search for the product you are looking for by entering part of the description of that product e.g. “ham”. This will show you all products (that match your entered text) available across all retailers
- search for a particular retailer by entering a part of the retailer’s name. This will help to refine your search of products to 1 retailer. When you have selected the retailer you may then click on that retailer to see all products supplied by that retailer.

Nearby to buy:

You may use the map to see which products or retailers are nearest geographically to your location. Feel free to adjust the radius distance e.g. if you only want to consider retailers who are located within ,say, 15km of your location then set the radius to 15km and the list will then reflect your choice. Or further extend the radius to ,say, 200km and see what products are available elsewhere in the country.

 you may enter your own specific address as a base location e.g. you may currently be at work at a different location from home but would prefer to see what products or retailers are closer to your home address. By entering an address all map searching will be based on this new entered address.

Selecting: - you can

- select a category to narrow the list of products to only those which are classified within your chosen category
- select a product from the list of highlighted deals / offers available

Buying from one or many retailers – all in one order:

Once you have located the product you wish to purchase you may continue to select as many products as you wish from that retailer and from other retailers. This will have the effect of having 1 order covering products from multiple retailers. You will then complete the check-out and payment process. ShopNearBuy looks after the correct allocation of ordered products to the appropriate retailers for delivery to you or collection by you.
